

FUEL DEAERATOR

eurosens® Deaerator is a special device designed to exclude air bubbles from the return fuel line. Deaerator is used together with differential flowmeters eurosens® Delta.

KEY FEATURES:

- ✓ Can be installed on diesel engines of boats, ships, rail locomotives, agriculture equipment, construction machinery, commercial vehicles.
- ✓ Insensitive to fuel system contamination.
- ✓ No polluting emissions.
- ✓ Vibration resistance.
- ✓ Compact size and weight.
- ✓ Simple installation.
- ✓ Minimal hydraulic resistance.

SPECIFICATION:

Max pressure	2.5 MPa
Ambient operating temperature	-40 - +85 °C
Connection thread	M14x1,5
Flow rate in l/h	250/500
Ingress protection rating	IP 66
