

Tyre pressure monitoring system

- For all kinds of automotive vehicles.
- Connection to GPS for remote monitoring

The System Components:

Sensors – internal or external.

Internal sensors:

- battery life 5 years
- non-replaceable
- installation requires tyre removal

External sensors:

- battery life 3 years
- replaceable.
- easy installation.

Driver display.

- shows tractor and trailer tyre pressure and temperature.
- alerts if the pressure is too high/low according to the settings.
- tyre overheat alarm.
- supports up to 38 tyres.

RS232 or CAN bus interface to GPS tracking system.

If your fleet already has a GPS monitoring system, the tyre pressure can be monitored remotely. Compatible with the most popular GPS trackers via CAN bus interface.

Extra functions:

Display of tyre pressure graphs

E-mail notification of too low/high pressure

Detection of attempted theft of new tyres

Proper tyre pressure means safety and fuel economy
